Education

2024

LVCC Apalit
ACT

An Associate in Computer Technology is a two-year program that provides foundational skills in IT, including programming, network management, and technical support, preparing graduates for entry-level tech roles or further study.

2024-Present
LVCC Apalit
BSIS

A Bachelor of Science in Information Systems (BSIS) is a four-year degree focused on integrating technology with business processes to enhance organizational efficiency and decision-making. The program combines courses in information technology, data management, business analysis, and systems development to train students in designing, implementing, and managing information systems that support business goals.
